Subject: Internship Application – Data Scientist Intern

Dear Sir or Madam,

Being a student at the University of Technology of Compiègne (UTC), I have the opportunity to complete a six-month internship from September 2025 to February 2026. I am deeply interested in handling databases, both for the complexity of their architecture and for the mathematical concepts used. Naturally, I was drawn to a Data Scientist internship and your company is currently offering the kind of opportunity I am looking for. I strongly believe that your commitments to innovation aligns perfectly with my career ambitions.

Being interested in machine learning and artificial intelligence, I have shaped my studies around data analysis, algorithmic reasoning, and applied mathematics. I am particularly curious regarding how Pernod Ricard leverages generative AI and data science to optimize operations, enhance customer insights, and innovate within the current global fast-evolving environment.

In terms of practical experiences, I have developed an expert system capable of solving complex mathematical problems using 131 inference rules divided in ten categories, such as vector spaces, projectors, and matrix diagonalization. I have also developed an interactive game demonstrating AI principles like backtracking and the functioning of inference engines. These projects reflect both my curiosity and my ability to implement theoretical models into real applications. Moreover, I have completed advanced courses in probability, statistics, linear regression, maximum likelihood estimation, and hypothesis testing.

I am really excited about the contribution I could bring to a working team, mixing data and AI, especially within a company as internationally renowned as Ubisoft. I am confident that this internship would allow me to grow professionally while adding value to your ongoing generative AI initiatives.

I thank you in advance for considering my application, and I would be happy to provide any further documents or attend an interview at your convenience.

Sincerely,

Mathieu PIEKARZ
